EXPERIENCE

Technocrat IT, Lagos. NG — *Frontend Developer*

JANUARY 2023 - PRESENT

- Developed an ERP System.
- Led a team having junior developers and interns to deliver weekly debugging and code refactoring tasks. This reduces the development time by 25%.
- Effected high end internal web applications for monitoring and capturing fraudsters, integrating .NET APIs with Angular to ensure proper end-to-end alignment and well accessible results.
- Collaborated with team members to deliver a data crawling web application for international fraud and security threat-related matters. This increased the fraud detection process by 53.5%.
- Upscale frontend codebase test coverage by 88.2%.

Refinitiv, England. UK — *Frontend Developer*

FEBRUARY 2022 - DECEMBER 2022

- Completed an email campaign feature which allows users to be able to choose between sending phone sms and shooting a direct email, this feature also allow users to choose the kind of builder to make use of for constructing the email, making their job 70% more efficient
- Eliminated redundant codes, made some simpler and more self explanatory to improve codebase performance by 40% more.
- Introduced the "Teammate" feature to allow for teams on a particular account, this means a user can now invite teammates to their team and give them a role(admin, member), different roles have limits to what they can do.

CDL Uniben, Benin City, Nigeria — *Frontend Developer*

FEBRUARY 2020 - JULY 2021

- Refurbished the company's website to increase accessibility by 82%.
- Designed a legal services app, a high end web application, utilized by legal firms to increase productivity by 45%.
